

POTASSIUM

Naturally derived amino acid-nutrient complex that enhances tissue absorption of nutrients, increases mobility throughout the plant, promotes rapid physiological response, minimizes phytotoxicity and environmental impact.

Key Benefits

- Potassium is essential for photosynthesis, enhancing energy production.
- Helps in regulating water usage and improving drought tolerance by controlling the opening and closing of stomata.
- O Boosts plant resilience against environmental stresses such as heat, cold, and disease.
- Supports protein synthesis and enzyme activation.
- Encourages strong root growth, improving nutrient and water uptake from the soil.
- Enhances the size, color, and taste of fruits and vegetables, leading to better marketability.
- Quickly addresses potassium deficiencies, which can cause issues like leaf curling and yellowing edges.
