N-Vitalize 8-0-0

Derived from soy protein hydrolysate, when used as a source of nitrogen, provides a readily available and plant-derived form of nitrogen that supports plant growth and improves soil fertility.

**Soil and Foliar Applied
Biostimulant** containing amino acids and polypeptides.

Benefits & Advantages

- Enhances stress resistance, improving plant resilience
- Acts as natural chelating agents, boosting nutrient uptake
- Promotes stronger root development for better water and nutrient absorption
- Increases crop yields
- Biodegradable, no soil contamination or harmful residue buildup
- Stimulates physiological processes like photosynthesis and respiration
- Compatible with other fertilizers and agrochemicals
- Non-toxic, safe for humans, animals, and the environment

Application

Application Rate = 1-5 gal/ac

- Planting
- Pre-Bloom to Fruit Set
- Early Growth
- Post Harvest
- Vegetative

Delivery

Yield Advantages On Multiple Crop Types
