

Rhizo Life™ K-Vitalize 0-0-10

A high analysis potassium source containing 10% soluble Potash from Kelp and 10% Humic Acid to improve nutrient efficiency.

Applied to the soil to strengthen and boost plant growth and uptake of K and other vital nutrients.

Organic Source of Soluble Potassium

- Enhances root development and plant structure
- Improves water uptake and drought resistance
- Boosts protein and starch production for better metabolism
- Provides natural plant hormones for growth and stress resistance
- Supplies trace minerals, vitamins, and amino acids
- Strengthens resistance to drought and heat stress
- Promotes larger, more abundant fruits and flowers
- Stimulates microbial activity for better soil health
- Minimizes nutrient leaching, keeping nutrients in the root zone
- Humic acids that feed beneficial microorganisms

Application

Rate Guidelines

Type	Application	Rate (lbs/acre/season)
Crops	Broadcast/	5-15 gal/ac
Trees/Shrubs	Broadcast	10-15 gal/ac

Application Rate = 0.25-15 gal/ac

Planting

Post Harvest

Delivery

Broadcast

In-Furrow

Liquid, Can Be Added to Current Fertilizer Blend

Yield Advantages On Multiple Crop Types

Nutrient Guarantees
10% Soluble Potash
10% Humic Acid
