

## Rhizo Life™ Hardy Prime

**Fulvic and humic acid stabilized micronutrient blend with a soluble potassium guarantee of 0-0-6.**

Includes Cobalt and Molybdenum as part of the blend. It is 50 mesh filtered and can be applied as a mid season fertility input to correct potassium and micronutrient deficiency.

### Application

Application Rate = 1-3 qts/acre

- Planting
- Pre-Bloom to Fruit Set
- Early Growth
- Fruit Fill
- Vegetative
- Post Harvest

### Delivery

- Fertigation
- Foliar
- In-Furrow
- Side Dress

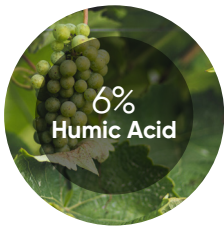

### Yield Advantages On Multiple Crop Types

Try making compost tea with Hardy Prime!

### Benefits of Hardy Prime

- Humic acid improves the plant's ability to absorb essential nutrients
- Better nutrient use efficiency
- Valuable source of trace elements
- Enhances soil tilth and structure
- Encourages robust root systems, aiding in overall plant vigor
- Supports beneficial soil microbes, contributing to nutrient cycling

- Provides a comprehensive mix of micronutrients for balanced nutrition
- Enhances plant tolerance to environmental stressors such as drought or disease.
- Increased flowering and fruit set

## Rhizo Life™ Hardy Prime WP

All the same benefits, in a wettable powder format.
